

2006 Forest Plan Huron-Manistee National Forests Administrative Correction #4 September 2, 2010

Correction to the 2006 Forest Plan, Appendix D, page D-3, Table D-4. Acres of Proposed and Probable Silvicultural Methods in the First and Second Decades from Lands Suitable for Timber Production.

Administrative corrections are defined at 36 CFR 219.31(b) in the 2000 Planning Rule, which became the effective rule for National Forest System planning on July 15, 2009¹. Such corrections may be made at any time and are not Forest Plan amendments or revisions.

Administrative corrections can be made under this rule within the following categories:

1. Corrections and updates of data and maps,
2. Updates to activity lists and schedules (proposed actions, anticipated outcomes, projected range of outcomes,
3. Corrections of typographical errors or other non-substantive changes, and
4. Changes in monitoring methods other than those required in a monitoring strategy (referring to the requirements for monitoring sustainability criteria in the 2000 rule).

Administrative Correction #4 replaces Table D-4 on page D-3, Appendix D of the 2006 Forest Plan. The action corrects typographical errors in projected acreage figures for several Vegetation Classes.

ORIGINAL –Table D-4, containing incorrect acreage figures.

Table D-4. Acres of Proposed and Probable Silvicultural Methods in the First and Second Decades from Lands Suitable for Timber Production.

Vegetation Class	Silvicultural Method							
	Thin		Clearcut		Shelterwood		Selection	
Decade	1	2	1	2	1	2	1	2
Aspen/Birch			24,100	28,000				
Short-lived Conifer			14,166	17,923				
Long-lived Conifer	35,432	54,512	1,634	1,096				
Low-site Oak			5,244	77				
High-site Oak	24,025	1,146			8,261	22,879		
Northern Hardwood								16,299
Total Decade 1	59,457		45,144		8,261			
Total Decade 2		55,658		47,096		22,879		16,299

¹ Compliance with District Court Injunction in, Citizens for Better Forestry v. USDA. Deputy Chief of the Forest Service memo, July 15, 2009.

CORRECTED – Table D-4, containing correct acreage figures.

Table D-4. Acres of Proposed and Probable Silvicultural Methods in the First and Second Decades from Lands Suitable for Timber Production.

Vegetation Class	Silvicultural Method							
	Thin		Clearcut		Shelterwood		Selection	
Decade	1	2	1	2	1	2	1	2
Aspen/Birch			24,100	28,000				
Short-lived Conifer			16,286	22,774				
Long-lived Conifer	35,432	54,512	11,184	7,101				
Low-site Oak			6,838	6,078				
High-site Oak	24,025	1,146	2,551	2,548	8,261	22,879		
Northern Hardwood								16,299
Total Decade 1	59,457		60,959		8,261			
Total Decade 2		55,658		66,501		22,879		16,299
